## [Sky Air Seal System](#)

For maximum Energy Conservation & Value

**Sky Air Seal System (SASS)** combines formaldehyde free JM fiberglass batts coupled with air sealing framing penetrations and sprayed polyurethane foam insulation to provide exceptional energy saving performance at a reasonable cost.

High performance is achieved by first caulking all exterior wall plates, jacks, jams, corners, and t-joints. Second, 1/2" polyurethane foam is sprayed into framing cavities to seal against air infiltration. Finally, formaldehyde-free, CFC-free JM batts are installed and slightly compressed to fill each cavity. We carefully cut and fit each batt for maximum thermal protection in exterior framing. "SASS achieves over R-15 in 2x4 walls and up to R-23 in 2x6 walls."

### Features & Benefits

- High Performance-Minimum R-15 in 2x4 walls & to R-23 in 2x6 walls
- Studies show well over 20% savings to heat & cool
- Air Seal package coupled with Polyurethane foam stops money wasting air infiltration
- Custom Fit-Sprayed foam insulation overcomes framing irregularities
- Sprayed foam cures to strengthen walls against racking
- Environmental-Non-toxic, formaldehyde-free, odor-free & resists mold

- **Healthy Homes-Sprayed foam provides a barrier to dust & mold spores**
- **Sound Control-Sealing foam & fiberglass combine to attenuate sound**
- **Possible to down Size HVAC-Due to tighter, more efficient thermal envelope**
- **Energy Star-"**SASS**" helps homes qualify for energy efficient mortgages**
- **No off gassing in completed wall system**
  
- **Meet the criteria of the Energy Policy Act of 2005 and earn a tax credit of \$2,000.00 for building homes that consume 50% less energy for heating and air conditioning than IECC code.**  
**Note: All building materials and techniques factor into tax credit equation. Not based solely on insulation package. This is a builder tax credit only, not intended for home buyer. Builder may choose to discount or share tax credit with home buyer.**

*We are the smart choice for energy conscious building*
